**RECORD OF DISTRIBUTION**

*The record of distribution, usually in table format, indicates the title and the name of the person receiving the plan, the agency to which the recipient belongs, the date of delivery, and the number of copies delivered. Other relevant information could be considered. The record of distribution can be used to prove that tasked individuals and organizations have acknowledged their receipt, review, and/or acceptance of the plan. Copies of the plan can be made available to the public and media without SOGs/SOPs, call-down lists, or other sensitive information.*

### INTRODUCTION

The emergency support function of transportation services involves direction and coordination, operations, and follow-through during an emergency or disaster.

#### Purpose

ESF-1 Transportation Annex supports the EOP and complies with standards set forth in the National Response Framework. This document provides guidance to prepare for, respond to, recover from, and mitigate the effects of a disaster or emergency on Chatham County's transportation infrastructure and networks. This however is not a tactical response document. ESF-1 Transportation is designed to ensure seamless integration of key transportation resources and information for preparedness, response, recovery, and mitigation activities to address an emergency or disaster.

#### Scope

ESF-1 acts to meet the transportation and essential elements of information needs of operations to include ground-based, maritime, aviation and rail-based transportation infrastructure support in emergency or a disaster.

## CONCEPT OF OPERATIONS

### General

During an emergency or disaster, ESF-1 may be activated to support operations and assist with the development of a common operating picture. The scope, scale and magnitude of the threat/incident will dictate which support agencies will be requested for the support of ESF-1 Transportation in the EOC.

### Preparedness

- a. Develop and maintain resource lists to support ESF-1 operations utilizing both public and private sector entities.
- b. Establish and maintain contact with the state and adjacent county transportation officials.
- c. Plan for supporting all types of evacuations to include suspension of construction and maintenance, lane reversal on evacuation routes, and state traffic management plans and operations.
- d. Participate in exercises and training.
- e. Estimate logistical requirements (personnel, supplies, equipment, facilities, and communications) during the planning process and through exercises.
- f. Ensure all ESF-1 personnel integrate NIMS principles.

### Response

- a. Identify transportation needs required to respond to the emergency.
- b. Coordinate use of transportation assets.
- c. Identify, obtain, prioritize and allocate available transportation resources.
- d. Report the locations of damage to transportation infrastructure, degree of damage, and other available information to the EOC.
- e. Assist local governments in determining the most viable, available transportation networks to, from, and within the disaster area.
- f. Coordinate emergency information for public release through ESF-15.
- g. Document matters that may be needed for inclusion in briefings, situation reports and action plans.
- h. Plan for transportation support of staging areas and distribution points.

**Recovery**

- a. Continue to render transportation support when and where required as long as emergency conditions exist.
- b. Coordinate the repair and restoration of transportation infrastructure with the assistance of ESF-3.
- c. Ensure that ESF-1 team members and/or their agencies maintain appropriate records of costs incurred during the incident.

**Mitigation**

- a. Support and plan for mitigation measures.

**Organization**

The County EOC will be activated to coordinate a multijurisdictional level response.

Representatives from the applicable ESF-1 Agencies may be assigned to the EOC or alternate location, as best suited to meet incident needs and coordinate operations.

**ESF Role Aligned to Core Capabilities**

The following table lists the response capability that ESF-1 most directly supports, along with the related ESF-1 actions supporting the capability.

Core Capability	ESF-1 Transportation
Critical Transportation	<ul style="list-style-type: none"> <li>• Provide transportation (including infrastructure access and accessible transportation services) for response priority objectives, including the evacuation of people and animals, and the delivery of vital response personnel, equipment, and services into the affected areas. This includes, among other things:                             <ul style="list-style-type: none"> <li>➤ Evacuation transportation assets</li> <li>➤ Evacuation routing</li> <li>➤ Re-entry coordination</li> </ul> </li> </ul>
Infrastructure Systems	<ul style="list-style-type: none"> <li>• Stabilize critical infrastructure functions, minimize health and safety threats, and efficiently restore and revitalize systems and services to support a viable, resilient community. This includes, among other things:                             <ul style="list-style-type: none"> <li>➤ Transportation network assessment</li> <li>➤ Communication of viable routes post-event</li> </ul> </li> </ul>
