Chatham County Debris Removal for Tornado Damage

SAVANNAH, GA – (May 25, 2017) Chatham County Public Works department has started the process of removing debris from the tornado impacted areas of Wilmington Island. Crews were on scene immediately following the event removing trees and debris from the roadway and will remain until the debris is removed.

Residents are reminded to move debris to the right of way in front of their homes but do not place in the roadway or around utility structures or pedestals. All loose vegetative debris should be containerized, preferably, in paper bags. The containers should not weigh more than 50 lbs. All limbs, branches and tree trunks should be no longer than 4 feet in length.

If a resident hires a tree removal service it is *strongly* suggested that the tree service remove all debris.

The Public Works department asks that resident be patient throughout the removal process.
